

# WEBD-1008

## *Project 2 Accessibility*

### Part 1

Using your files from Project 1, and using [axe DevTools](#) run an accessibility check on your webpage. Best Practices must be turned on. 📸 Screenshot how many issues you have and be sure to include this image in your final submission.

Using your own judgment\*, fix as many of the issues as you can. You should aim to solve at least 80% of the issues on your page.

*\*There can be multiple solutions to solving these issues. Come up with what you think works best!*

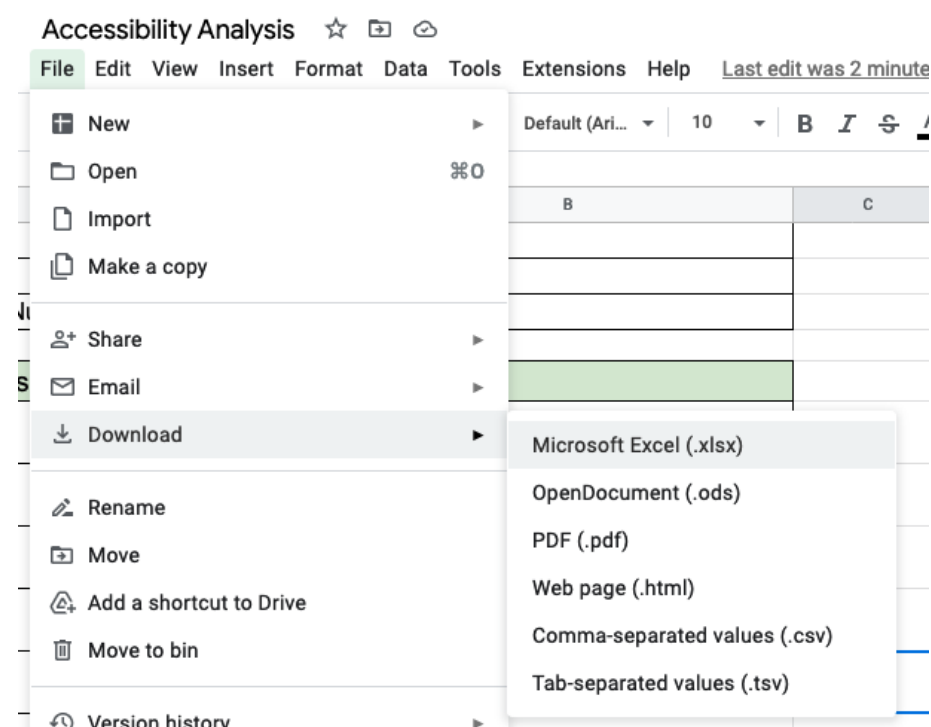

In the end, the page should be mostly, if not completely, free of accessibility issues, and still valid markup. Be sure to use the [W3C Validator](#) to ensure your markup is still valid.

### Part 2

Using a website that you frequent often, run an accessibility check on their home page. How many issues were there?

With your vast accessibility experience, provide at least 5 accessibility improvement suggestions to the site owners with explanations as to their importance.

Download a version (screenshot 📸) of this [Accessibility Report](#), and fill out the spreadsheet with your suggestions and explanations. Include this in your submission.

# Submission Checklist

Project 1 Files with Accessibility Changes Made	
Screenshot of Error Check from Axe Tools	
Completed Accessibility Report of chosen website	
Zipped folder of ALL files submitted to Learn	

# Rubric

	2 Marks	1 Mark	0 Marks
Part 1	80% of issues not fixed  Screenshot not included	Markup not valid	Accessibility issues fixed  Markup is still valid
Part 2	Accessibility Report not submitted	5 thoroughly described suggestions not made  Report is incomplete	Suggestions are well thought out and explained  Report is complete
